**Weather Summary/Alert:**

According to medium range weather forecast of IMD, MC, Bhubaneswar, there is no chance of occurrence of rainfall and clear to partly clear sky is expected during upcoming week. No large change in both Maximum and Minimum temperature is expected in upcoming 5 days. Moderate relative humidity along with a wind speed of 3-7 km/h is predicted in north-easterly and south-easterly direction.

**General Advisory**

- Looking to the clear weather condition in upcoming days, farmers are advised to harvest their matured crop and dry it properly before storage.
- Slight increase in minimum temperature is expected in upcoming week, so farmers are advised to conduct sowing of vegetable seed during this period for proper germination.
- Farmers are advised to provide one live saving irrigation in standing crop fields because there is no chance of occurrence of rainfall in upcoming days.
- Avoid over watering in fruit and vegetable crops because it may cause flower drops at flowering plants.

**SMS Advisory**

- Regular monitoring of Mango plant against hopper attack should be advised.

**Crop and livestock Specific Agromet Advisory**

<b>Name of the crop</b>	<b>Crop Stage</b>	<b>Agromet Advisories</b>
<b>Rabi Rice</b>	<b>Nursery seedling</b>	<ul style="list-style-type: none"> <li>In heavy weed infestation area, to control weeds in nursery, spray Pyrazosulfuron-ethyl 10%WP @ 80 g/ acre at 3-5 days after sowing (DAS) or Bispyribac sodium @ 120 ml/ acre at 10-12 DAS (or at 2-3 leaf stage of weeds) in 120 litres of water.</li> </ul>
<b>Mustard</b>	<b>Pod development/ Harvesting</b>	<ul style="list-style-type: none"> <li>Harvesting of mustard crop should be done when most pods (about 75%) turn yellow and seeds are hard. Cut plants in the early morning to minimize seed loss from shattering due to wind or sun. Stack harvested crops (sheaves) on the threshing floor for 7-10 days to dry thoroughly. After proper drying, thresh the dried crop to separate seeds from the plant.</li> </ul>
<b>Mango</b>	<b>Flower initiation</b>	<ul style="list-style-type: none"> <li>Avoid over watering at this stage because it may leads to flower drop or excessive vegetative growth.</li> <li>Monitor the plant against hopper attack.</li> <li>Spraying of wettable sulphur fungicide @ 2g per liter of water should be</li> </ul>

		advised to control fungal diseases in Mango crop.
<b>Cole crop (Cabbage, Cauliflower, Broccoli etc.)</b>	<b>Vegetative Stage/ Fruiting</b>	<ul style="list-style-type: none"> <li>If Diamond back moth attack observed in cole crops then spraying of neem oil @ 5 ml per liter of water should be advised at initial stage. In severe case, farmer should use Spinosad 45% SC @ 0.4ml or Rynaxypyr @ 0.3ml or Emamectin Benzoate @ 0.4 g per liter water to control this insect.</li> </ul>
<b>Chilli</b>	<b>Vegetative / Flowering/ Fruiting stage</b>	<ul style="list-style-type: none"> <li>If leaf curl disease was observed due to sucking insect pest attack, initially spray 5 ml of neem based insecticide mixed in one liter of water. If still persist, then spraying of Spinosad 45% SC @ 0.4 ml or Fipronil 5% SC @ 2 ml per liter of water at an interval of 7-10 days should be advised.</li> </ul>
<b>Cows and Buffalos</b>	<ul style="list-style-type: none"> <li>Provide mineral mixture along with salt regularly and ensure a balanced diet of high-quality forage.</li> <li>Vaccinate the animal against FMD, HS, BQ etc. and keep the shed clean and dry to avoid infection.</li> </ul>
